

RainMan

Flow Management Solutions

Automated Control Valves

RainMAN Automatic Control valves are the perfect partner for your control system and are designed to be used in a wide range of applications in irrigation, water treatment and HVAC systems.

Key features.

- Powder coated alloy housing.
- High torque motor
- Manual override
- Position indicator
- Limit switches
- Captive lock
- DN50 to DN400
- Isolation or Regulation
- Wireless option with RainWAN node

Technical Data			
Valve type	PVC Wafer	Voltage	110,220,38VAC, 50/60Hz
Actuator type	Isolation		12, 24 VDC
	Regulation	Input (Isolation)	Digital, 4-20mA
Available diameters	DN50 to DN400	Input (Regulation)	0-5VDC, 0-10VDC, 4-20mA
Max pressure	1.0mPa	Indicator	Visual Dial
Environmental	IP65 Rated	Manual	Keyed gear mechanism
	-30 to +60 Celsius	Seal	EDPM Rubber
